Türkiye

Türkiye is one of the leading countries in World trade under favour of its geopolitical position, historical background, cultural richness and industrial development level. By virtue of all these advantages, Türkiye's export amounts have been rising year by year. Especially in last 10 years, Türkiye breaks its own exporting records in a row. Despite the global economic crisis, Sector was over 1 billion dollars of export amounts in recent years.

As Turkish Ship Yacht and Marine Services Exporters' Association we are organizing and participating in major maritime exhibitions, arranging workshops, following all the news and developments about sector, performing Works and studies to find a way about all the issues of sector, organizing sectoral trade delegations to target countries with the intention of increase our export level more and more.

In this context, we are glad to participating in POSIDONIA 2026, one of the Global Shipping Industry's foremost events, as Turkish Ship Yacht and Marine Services Exporters' Association. Turkish companies participating in such an important event, reflect the Turkish Ship Yacht and Marine Services industries' World class expertise in the sector, be it master planning, high-end engineering, designing, Project management and consultancy or innovative and environmentally friendly products.

I hope that during this fair all Turkish companies will take the opportunity to discuss the ways in which we can help tackle barriers that are getting in the way of new business opportunities in Shipping Sector.

Thanks to all Exhibitors of Turkish National Pavilion and everyone who contributed to make this event possible.

Cem SEVEN
Chairman of The Board
Turkish Ship Yacht and Marine Services Exporters' Association

ABOUT TURKISH SHIP YACHT AND MARINE SERVICES EXPORTERS' ASSOCIATION

Turkish Ship Yacht and Marine Services Exporters' Association was established in April 2010. Its mission can be defined as to contribute sustainable economic development to Turkish Ship and yacht sector through improving exportation. It has over 1667 members as of 2024.

Aim of Turkish Ship Yacht and Marine Services Exporters' Association can be defined as enhancing export capacity and performance of the sector and supporting its member companies for better commercial relations and practices in foreign trade.

Turkish Ship Yacht and Marine Services Exporters' Association maintain several activities and practices, as:

- Contribution in designing sector policies and priorities,
- Conducting market researches,
- Conducting projects to enhance the sector's competitiveness,
- Keeping export statistic and reporting,
- Preparing evaluation reports,
- Organizing National Pavilions of Türkiye at International Maritime Exhibitions,
- Organizing match making events such as incoming and outgoing trade delegations,
- Preparing sector brochures and profiles,
- Vocational training activities

SHIPBUILDING INDUSTRY

The history of shipbuilding in Anatolia dates back to 1200s. During Ottoman period, the industry reached at a worldwide size. Following foundation of the Republic, shipyards were given special importance. At the beginning, they were mostly located around the Bosphorus and Haliç (the Golden Horn), but after 1969 they moved to Tuzla, Yalova and other coasts.

Türkiye, surrounded by sea on three sides, is a natural bridge between Asia and Europe. It has borders to the Black Sea, the Mediterranean, the Aegean and the Sea of Marmara. The growth of the World trade, high freight rates and renewal of Merchant fleets in accordance with international rules are effective in the development of the sea transport and shipbuilding industry. As a result of Türkiye's geographical location and global developments, Türkiye's shipbuilding industry has been boosted.

Traditional shipbuilding skills combined with modern techniques and education has enabled

Turkish shipbuilding industry to develop into an internationally known trademark since early 1990s. Türkiye is a growing force within the international maritime sector. Turkish shipbuilding industry has modern, technologically developed and certified shipyards, together with a well-experienced work force. The industry has rapidly achieved significant development in a short period of time. In 2000s, Türkiye improved its shipbuilding industry rapidly and became the fifth largest shipbuilding country in the world.

YACHT BUILDING INDUSTRY

Traditional boat building skills combined with modern techniques and education has enabled the Turkish boat and yacht building industry to become an internationally known source since the early 1990s. Turkish boat building companies follow the technological developments in their shipyards. Yachts and Boats built in Türkiye have been exported almost all over the world. Türkiye has shown great progress in building Boats, Yachts and Mega Yachts. Our clients are pleased by repeating orders and getting value for our services. Türkiye seems to be standing forward for its services and price advantages when compared to the other countries in the boat and yacht building sector.

REMARKABLE TYPES OF BOATS AND YACHTS ARE DESIGNED AND PRODUCED IN TÜRKİYE

Classic Wooden Yachts. Turkish Boat Industry proudly builds classic wooden yachts by design offices, engineers and highly skilled craftsmen. The virtues of the craftsmen are based on 800 years of Turkish boatbuilding tradition. Each yacht is customized for its owner by using variety of options and alternatives to standard features.

Mega Yachts: Since 1992, Türkiye retains its leading position in the world. In terms of the number of yachts and length, with regard to mega yachts. Turkish yards have gained recognition in the World Boat Industry because of their quality.

Türkiye is a repair and maintenance center in the world as well as a production center. Serving thousands of foreign flagged yachts each year.

Türkiye is on the crossroads where two continents meet and serving as a bridge between the East and the West. Türkiye, a member of European Customs Union since 1996, launched EU accession negotiations by 2005. The membership to the WTO and the Customs Union relations are Türkiye's pivotal economic involvements laying a free and fair trading environment in Türkiye. Türkiye has signed Free Trade Agreements (FTA) with 16 countries and, more FTAs are underway.

In spite of negative effects of the global crisis, Türkiye ranks 17th among the largest economies in the World and 6th in Europe. Türkiye is boldly being displayed as one of the top ten emerging economies of the World by the leading authorities in the field.

Türkiye lies between Asia and Europe serving as a bridge geographically, culturally and economically. Thanks to its favourable ecological conditions and climate, Türkiye benefits from a major agricultural sector and is the largest producer and exporter of agricultural products in the near region.

Türkiye's advantages:

- Advantageous geographical location,
- Favourable climate conditions,
- Proximity to major markets

With its favourable geographical conditions and climate, Türkiye is considered to be one of the leading countries, especially in the field of agriculture and related industries. This impressive position is best attested by rising exports in almost every kind of agricultural products.

PRODUCT RANGE :

New ship building and construction up to 200 x 60 m all kinds of vessel. Ship repair, maintenance, conversion for all kinds of vessel up to 370 x 70 m.

ABOUT COMPANY:

İCDAŞ has the proud of bringing a very well-established family tradition, which started with ship repairing in İstanbul in 1880's, up to the present day. Aslan family, which made a bold step into the steel industry with casting and machinery processing in 1954 and built its first rolling mill in 1961, has brought İstanbul Çelik Demir İzabe Sanayi A.Ş. into life in 1969.

The Shipbuilding business took a new turn in 1996 when İCDAŞ bought Biga Shipyard, which had been operating since 1960. This facility, located next to the company's integrated steel mill complex at Çanakkale, significantly expanded its shipbuilding activities. The ship repair shop of early 1900's became a multi million USD integrated facility after acquiring a shipyard in Biga-Çanakkale Province in 1995. İCDAŞ, which has been producing structural steel and alloy steel is the 2nd largest steel producer in Turkey with its production capacity.

İCDAŞ also have one of the largest dry dock in the region and the largest dry dock in Turkey with a length of 370 metres, a width of 70 metres and a depth of 10 metres and also able to carry out ship repairs and maintenance at 1500 metres long berth.

Pilotage & towage, emergency response, salvage and wreck removal, pollution prevention, and chartering.

ABOUT COMPANY:

Med Marine is a leading Turkish shipbuilder and tugboat operator, providing a broad range of services in towage, pilotage, and mooring in the busiest ports of Türkiye for over 30 years.

Eregli Shipyard, owned by Med Marine Group, is among the largest shipyards in Türkiye based on some 180.000 sqm with more than 30.000 sqm indoor areas to build state-of-the-art tugboats, workboats, offshore vessels, and coated/Stainless Steel (STST) IMO II type chemical/oil tankers, either for its own operations or clients around the world. Med Marine has a wide selection of state-of-the-art tugboat design portfolio and the Shipyard is constantly being improved with advanced production standards by keeping up with latest health, safety and environmental regulations. Med Marine has successfully completed the construction and delivery of 200+ projects, including tugboats, chemical/oil tankers, mooring and pilot boats. Eregli Shipyard has received certifications for "Shipyard Security Compliance" and "Shipyard Production Compliance" certificates to build naval ships for Turkish Military and NATO.

Med Marine is a member of European Tug Owners Association since 1997, and a member of BIMCO since 2000. In addition, Med Marine was awarded ISO 9001 certification in January 2001 by BV, and in 2010, ISO 14001:2004 & OHSAS 18001:2007 certificates have been achieved.

Its services include ship classification covering new building and in-service vessels, plan approval and surveys throughout the vessel lifecycle. In addition, Türk Loydu performs statutory surveys on behalf of flag administrations and delivers certification, inspection and verification services in line with applicable international and national requirements. All services are carried out through an international network, based on independence, impartiality and technical competence.

ABOUT COMPANY:

Türk Loydu is an internationally recognised classification society providing classification, certification, inspection and verification services for the maritime and industrial sectors. Acting in accordance with internationally accepted rules, standards and conventions, Türk Loydu conducts its activities with a focus on safety, structural integrity and regulatory compliance.

As a full member of the International Association of Classification Societies (IACS), Türk Loydu is authorised to develop and apply its own classification rules and to perform statutory surveys on behalf of flag administrations. Its classification services cover the full lifecycle of ships, including plan approval, construction surveys and in-service inspections, supporting the seaworthiness and operational reliability of vessels.

In addition to classification, Türk Loydu provides a broad range of conformity assessment and certification services in line with international and national regulatory frameworks. These services are delivered to shipyards, shipowners, operators and industrial stakeholders, addressing both mandatory and voluntary compliance requirements.

Through its expanding international network, Türk Loydu supports projects across different regions with a consistent technical approach. Its activities are based on independence, impartiality and technical competence, ensuring that surveys, certifications and verifications are carried out in accordance with applicable rules and standards. In this framework, Türk Loydu contributes to the safe and reliable operation of maritime and industrial assets worldwide.

ABOUT COMPANY:

Yaf Diesel was established in 2008 Türkiye, China , Korea, Germany and Dubai/U.A.E by experienced marine engineers especially in diesel engines, gear boxes, turbocharger parts supplying, reconditioning and repair.

Our head office, workshop and freezone warehouse are located near shipyard area in Tuzla where the most major shipyards are located. We also have warehouse in Shanghai/China,Busan/Korea,Bremen/Germany and Abu Dabi/U.A.E. so we are able to provide competitive prices, quick and correct supply to the customers. We keep more than 10.000 kinds of engine parts in our warehouses from well-known high-quality manufacturers which have been approved by the engine builders or by their subcontractors.

Yaf Diesel is the representative of the BSKY Balast Water Management System which is only one system without filter in the World with USCG , KR TA, BV TA,CCS G8 TA,PRS,RINA,IACS member class certificates

Some of representations of Yaf Diesel in Türkiye territory are Luminultra, Riken, Daido, Yukang Stern Tube Seal South Korea, Hangzhou Advance, Chongqing and Fada gear boxes.

Our own workshop especially reconditioning and repair diesel engines, gear boxes and turbochargers with well-educated and experienced service team. Yaf Diesel has BV Certificate.

We provide you time trouble-free supply and service, we work with more than 200 high skilled employees in 5 countries just for your engine run.

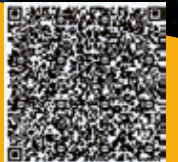

Yaf Diesel also has its own shipyard and operates the new building industry.
